Dr. Ross Addresses Over 300 Persons in Coleman

Approximately 300 Crows Nest Pass persons gathered in the Coleman high school auditorium Friday evening, February 17 to hear Dr. J. Donovan Ross, Minister of Health, speak on the proposed Sulphur Recovery Plant west of Coleman.

Dr. Ross advised that the government are prepared to approve the site west of Coleman providing steps are taken to safeguard health of the people in the area. He added that he felt an affirmative reply would result from the recommendations.

The meeting opened after Mayor Frank Aboussay introduced the various representatives of the Crows Nest Pass towns from Cowley west to Coleman.

Mayor Jalpep of Blairmore, acted as chairman of the meeting, and in a few remarks stated that all looked at the plant as an aid to the present falling coal industry and felt that construction of such a plant would help the present unbalanced economic set-up in the Pass.

He stated that we all want the plant very much, and also want the cautions taken to prevent any health hazards. He then called on William Kovach, M.L.A., to introduce the Hon. Dr. Ross, the Minister of Health for the province.

In his opening remarks Dr. Ross advised that the problem of health hazards has been brewing for several years with the discovery of natural gas in Alberta. Since export of gas was approved, the government realized that there would be a great deal of industry springing up in Alberta and steps would have to be taken to prevent any health impairment that might arise.

He said that several plants approximately half a dozen have been built so far in Alberta, but the site chosen here west of Coleman at Sentinel will not be duplicated anywhere on the continent.

He added the government felt that careful scrutiny was needed of the area before a decision was made.

He pointed out that they were concerned with hazards that could happen here in this valley which is a long, narrow valley, 10 to 12 miles long, with some 6,000 to 8,000 residents living here. Being aware of the hazards that pollutants have created in other parts of the country, we were careful of results involved, and Dr. Katz and Dr. Munn were engaged by the companies to make studies and produce figures.

A preliminary report presented by Dr. Katz advised that there was absolutely no danger to human health but that there was a possible danger of vegetation damage.

Dr. Ross cited a number of instances on record where air pollution had created a health hazard, which included the London smog, the California smog, the Denora problem in Pennsylvania in 1948, which resulted in a number of deaths, and many illnesses and the Belgian episode.

Because of such instances, he said, we are concerned with the health of the people. He said, we have a valley here varying from 4,000 to 4,100 feet in elevation and going up to 7,000 feet at the mountain tops, which created a considerable trough. As a result of this he said they had advised the company that if it was possible to find another site where such hazards were not present, that it would be better. If they had to change the location it was asked that the plant be kept in the very near vicinity of the Pass and the Burmis site was suggested.

The companies involved pointed out that a site other than the proposed site at Sentinel would involve an additional expenditure of over \$2,000,000 in pipe, engineers and going back over the entire process. When this was pointed out to the government and the department, they in turn advised that if the companies involved met certain conditions to safeguard the health of the people, they were prepared to allow construction at Sentinel.

Dr. Ross then indicated that the 18-inch pipeline from Saravna

Creek to Sentinel would be approximately 40 miles long and would be carrying wet gas or raw gas having a sulphur content of 14 to 15 per cent, which gas, if it ever got loose could be disastrous.

He said that the gas in the pipeline presented a potential hazard and the health department wanted assurance that if the line should ever break automatic dump valves would take over to release the gas in the section of the pipeline concerned. The valves should be of such a nature that they would automatically close if pressure increases or decreases unduly in the pipeline. It was also pointed out that the Provincial Board of Health requested that specific instructions be given to all operating personnel to the action they will take in the event of emergencies arising and that a copy of these instructions be forwarded to the Department of Health for their files.

With respect to the processing plant it was asked that the following changes be incorporated into the plant construction (Saravna Processing Company Limited)—1, that they increase the height of emergency flares from 100 to 160 feet. It was understood that sour gas or acid gas will be flared only under emergency conditions and then for as short a time as is practical.

2, the waste liquids going to the flare pits present a potential odor hazard and the department asked that all liquids be thoroughly degassed prior to release to the flare pit, and that the release gases be effectively incinerated at 1,000 degrees Fahrenheit. A gas liquid separator operated at atmospheric pressure and at an elevated temperature should be satisfactory. 3, It was asked that evaporation ponds be increased in size to approximately 400 feet by 100 feet by eight feet deep so that a full year's detention of waste liquids is possible. 4, a disposal area should be provided for solid refuse, both during the construction period and during actual operation.

A trench and fill method should be practiced and the areas surrounded by a snow fence to minimize dispersion of wind, paper, etc.

It was also pointed out by Dr. Ross that the department had made provision so that when waste liquids would be drained out this will be done when the river is at its highest level in order that any contents in the waste liquid will be less harmful to fish and game.

The department also recommended that the company will maintain a program of air monitoring that will be satisfactory to the Department of Health.

This program consists of 1, It is understood that all residue gases will be incinerated to sulphur dioxide and vented to the atmosphere at 1,000 degrees F. through a 300-foot-high stack at a maximum rate of 60 long tons of sulphur dioxide per day.

Various types of equipment and devices to be set up at locations in the Pass to check and register any possible air pollution. It was also recommended that mercaptans or other odorous gases shall not be released or allowed to escape to the atmosphere except during emergencies and that at all other times they shall be effectively incinerated to effect them non-odorous to the atmosphere.

In his concluding remarks, Dr. Ross stated that he did not think that any dangerous levels will arise and should any arise the department would take steps to see action is taken to correct this.

Coleman A.T.A. Hold Meeting

Reading was the topic chosen by Mrs. B. Beck for a talk recently given at a meeting of the Coleman Sub-Local of the A.T.A.

Mrs. Beck spoke in particular of free or supplementary reading. Teachers of all grade levels recognize that the student who enjoys reading, and who reads widely, has a scholastic advantage over one who does not.

Teachers encourage pupils to keep library books in their school desks, readily available for use between assignments. School time is allotted and various means used to determine what, and how much, the pupil is reading.

Mrs. Beck said that many children do not do enough reading at home and that parents could assist by organizing more home reading periods; the habit of reading for enjoyment is most valuable.

Speaking of television, she said that children very often waste valuable time watching unimportant programs. However, TV can be stimulating. Mrs. Beck, in touch with librarians in several large cities, found that since the advent of television children had been borrowing many more books to get information about something seen on the screen.

A few "comic" books have interesting topics but they cannot add much to a child's reading ability.

Mrs. Beck concluded her interesting and informative remarks with this statement: "The ability to read with speed and comprehension is man's most potent skill and the keystone of intelligence."

Empire Cafe Re-opens

Frank and Maureen Tusock of Simco, Ont., last week took over the operation of Empire Cafe in Coleman, which has been inoperative for some time.

Prior to coming to Coleman to take over the business, Mr. and Mrs. Tusock were in the restaurant business in Simco.

The couple have three small children. They plan to keep the cafe open from 6 a.m. daily to 1:30 a.m. and will serve full course meals as well as short orders.

Their specialty will be home-made pies and lunches packed.

Frank Couple Celebrate 40th Wedding Anniversary

Mr. and Mrs. Jerry Wyshild of Frank celebrated their 40th wedding anniversary on February 14. They were married in Blairmore United Church in 1921. Rev. W. T. Young performed the ceremony.

They resided in Blairmore for three years before moving to Frank where they purchased a home and have resided there since.

Friends in the Crows Nest Pass wish them many more years of happy married life.

The last decennial census of Canada showed Alberta's population was 48 per cent of British Isles origin, 17 per cent American, 11 per cent German and 11 per cent Ukrainian.

He added that the department trusted that any nuisance possibly created would be accepted as an industrial nuisance. Summing up all recommendations and inferences made at the well-attended meeting, it would appear that the go-ahead green-light signal will be given in the immediate future on the construction of the sulphur plant at Sentinel as many of the recommendations made have already been embraced in the sulphur plant company's plans for the industry.

It is expected that the industry will employ some 40 to 50 men when completed and a great deal more during the construction stages. Several indications have also been made by various reliable sources that other industry will follow the sulphur plant.

Much credit is due to the Crows Nest Pass Towns committee headed by Mayor Aboussay of Coleman and the Blairmore and Coleman Boards of Trade, for the work they did in going all-out to show the government and companies involved in the sulphur plant that this industry was much desired by the residents in the Pass and would help the economy of this area.

Considers Remarks of M. P. Unfair

Coleman Police Chief considers remarks by M.P. in Throne Speech unfair to Municipal Police.

Chief of Police Ed Corson of Coleman, Alberta, was referring to a statement published in The Lethbridge Herald on Saturday the 25th day of February, when Mr. Roy Ellis, M.P., Grouard, Alberta, stated that some of the municipal police forces in the province were untrained, undisciplined and unqualified. Many municipal police were laboring under inexperienced supervision, some municipal police force members were even given their jobs to prevent them from becoming a welfare expense to their respective municipality.

It could be that Mr. Ellis did not read his speech to read as it did. The fact must be recognized that many of our municipal policemen have received extensive training at Government sponsored schools held at Calgary and Edmonton.

Many municipal Police Chiefs, who have not taken these government sponsored courses have already been fully trained at accredited Police Colleges by competent instructors. There are many municipal policemen who are ex-RCMP officers.

Statements as made by Mr. Ellis embarrass the individual municipal police office and lower the prestige of all municipal police forces. Respect for authority must be based on confidence in that authority. This would be seriously damaged if an arrested person or one being issued with a ticket for a traffic violation, felt that the officer concerned, kept his position only to prevent him from becoming a welfare case. Law enforcement is sufficiently difficult without further undermining of respect for our officers or officers.

Chief Corson says he honestly believes that around 90 per cent of the police in Southern Alberta policing municipalities, are either fully trained and qualified police officers, or they are working under the supervision of such trained officers. It is also his belief that many of our municipal police officers have training and experience that is on a par with members of the RCMP. In some cases their police qualifications are equivalent to that of a sergeant in the RCMP.

J. C. Kellock Passes Feb. 19

James Campbell Kellock of Calgary, a former resident of Coleman, died at his home in Calgary on Sunday, February 19th.

The late Mr. Kellock, 40 years of age, was born in Coleman on September 9th, 1920. He attended public and high school in Coleman, and later attended Mount Royal College in Calgary.

He was predeceased by his father, George, in Coleman in 1940, after which the family moved to Calgary.

Deceased was a member of the Calgary Elks Lodge and of the Presbyterian Faith.

He was predeceased by a sister Mrs. J. (Agnes) Pratt of Coleman. Surviving are his mother, Mrs. Jean Kellock of Calgary, and a son George, 19, of Edmonton.

Funeral services were conducted by the Rev. Eiesby at Leyden's Funeral Home in Calgary, after which cremation was made, on Thursday afternoon at one p.m.

Mrs. Mike Kinakin Bereaved

Mr. Nicholas Chernoff, father of Mrs. Kinakin, passed away in the Kaslo, B.C. hospital on Feb. 16th at the age of 72 years.

He is survived by his wife, four daughters and four sons. Funeral services were held at Selma, B.C.

Mr. and Mrs. Kinakin and family attended the funeral.

Lack of Interest at Annual Ratepayers Meeting

A very discouraging number of ratepayers attended the Coleman annual ratepayers' meeting held Monday evening, February 13.

Mayor Frank Aboussay gave a report on the general business of the town, dealing principally with the Coleman Light and Water Co. Limited, which had again showed a normal operating profit.

The financial statement showed that the balance January 1, 1960, in this company was \$31,929.23 and with a net profit for the year of \$20,821.62, totalled \$52,750.85. With the sum of \$21,000 being used in town operations a balance of \$31,750.85 was realized.

Councillor Walter Dibblee reported for the town's building, advising that the council chambers, town office and police office had been repainted during the year as well part of the upstairs of the town building. Roofs on the garage and the town hall were also re-coated. Alterations were made to the fire hall in order that the remodelled fire truck could be housed in the building. This entailed altering the present doors of the building.

Armaldo Deluca reported for the Health and Welfare Department in the absence of Councillor Angelo Toppino. The report showed that there was no hospital requisition charged to the town for 1960 as this practice has been abolished.

He stated that welfare cases in town were chiefly the responsibility of the provincial government.

There are at present two cases supported by the town with 80 per cent of the cost of this relief being borne by the government. There are two cases that are the government's responsibility.

Councillor Joe Wavrean, chairman of the Parks, Cemetery and

Rink committee, presented the next report, that showed that no new work was carried out in the park with the exception of altering the Creek channel which was straightened out in several spots. Main expense encountered by this committee this year was the cost of the arena insurance which came to a figure of \$1200.00.

Councillor John Ramsey, chairman of Public Works, then presented his report, which indicated that asphalt had been laid on 1,000 feet on sidewalk from Kapalka's west to the end of the street in West Coleman. He also stated that curbs had been built from Karpenko to Rudy's Service Station, from the post office to the bank, east side of Pep's coffee shop and some in the vicinity of the fire hall.

Road grading had been done from Owen's Store to Karpenko's, from the high school to the creek on the north side of second street, from the Central school to Cozzi's on 3rd street and from the highway at Bond's corner to 5th street.

Mr. Ramsey added that the usual routines such as snow removal, drainage problems, grading streets, town clean-up, equipment and general maintenance, asphalt applications to streets, etc., were all carried out during the year.

The Municipal Inspector's report was read which showed that town business had again been conducted in a very efficient manner.

Chairman of the meeting, was Mayor Frank Aboussay and secretary was T. A. Collister.

Cubs Hold Social Night

Some 20 parents of the Coleman Cubs attended an affair held in the United Church club rooms Tuesday evening, February 21st, when three Cubs, Fred and Mike Yan and Douglas Ulysses of Coleman, received their caps and scarves.

The Cubs gave a demonstration of Cub "War Dances" and also gave an exhibition of exercises done by the pack.

The affair concluded after coffee and cookies were served by the Cubs.

Employees To Negotiate Own Contract

In the government-supervised vote held recently the United Brotherhood of Carpenters and Joiners has been de-certified as the bargaining agent for workers at the Revelstoke Sawmill Co. Ltd., sash and door and prefabricating factory, and retail lumber yard in Calgary.

There are 74 employees involved. They likely will organize an employees' association and negotiate a wage contract before the summer.

The union acted as a bargaining agent for employees at the Revelstoke plants since 1945. The International Woodworkers of America is still certified in the Atlas Lumber Co. sawmills at Rocky Mountain House and at Sentinel.

Former Coleman Boy Recognized For Skiing Ability

David Sprlak, ten-year-old son of Mr. and Mrs. Joe Sprlak of Lake Louise, and formerly of Coleman, is making a name for himself in skiing circles in the Banff-Calgary district.

At the Revelstoke Junior Ski Championships, held this month, David topped first in the mid-gut downhill, the mid-gut slalom and the mid-gut Alpine combined.

David is one of a team of four skiers comprising besides himself, Mike Shepherd, 10; Keith Shepherd, 13, and Ian Shepherd, 14, all of Lake Louise.

The youths are being coached by Franz Haas, and the junior squad will this week be taking part in the ski competitions in Jasper.

Neighbors Trade Houses

Mr. and Mrs. Steve Krzywy and Mr. and Mrs. W. Field swapped homes.

The Krzywys home and grounds was on a large plan and they preferred a smaller home in which to enjoy their retiring years.

The Fields and their young family preferred a larger home so these neighbors agreed to trade their property. Both parties are happy in the new set-ups.

Jack Evans, treasurer of the Muscular Dystrophy Association of Canada, lets MD victim Debbie Selmes listen in to the news that the 1960

March for Muscular Dystrophy has raised a record-breaking \$335,000 for medical research.

Of Many Things (By Ambrose Hills)

The Curse of Unemployment
There is no general understanding of how unemployment hurts the economy. Too many people believe that the only persons hurt are those out of a job.

Recently, the owner of a furniture store pointed out how unemployment affects the buying of many others. "It's not the ones who get laid off that affect me most," he said, "It's the three or four neighbors who quit buying when one guy gets dropped."

Another said, "With the politicians shouting business crash and that Russian hammering on the table with his shoe, how can anyone think of furniture?"

Unemployment is Canada's most serious problem for the very reasons outlined by these worried furniture dealers. Aside from the suffering of the individual laid-off, there is the lack of confidence large lay-offs prompt.

The solution to unemployment is not nearly as complicated as is generally thought. Get business booming again and unemployment will disappear. Business cannot boom when products must be priced too high; and prices cannot come down while wages and taxes go up.

Some political courage is going to be required. Wage rates must be held in check. Tax rates must not go up — indeed, there ought to be massive reductions. Social services should be reduced or held at their present level. Business should be encouraged to further automation and streamlining. Whatever is required to make Canadian products competitive in world markets must be done—and soon.

If action is taken promptly all will be well. The Canadian economy is relatively sound. The storm warnings are clear, and there is time to batten down the hatches and trim the sails.

Some action has already been taken by the government at Ottawa. Not enough, and not explained to the people with the clarity required. Nevertheless, enough was done to illustrate that the government knows what is needed. They may go further in the next budget.

Unemployment is a curse more serious than many people realize. Its evils should be fully explained. Then the nation would be ready to accept the rather painful surgery required to cure it.

March 5th National Education Week

Education is a key that opens many doors, but too many students in Canada today are losing the key before they find a lock to open.

The week beginning on March 5 is National Education Week. Unlike many weeks that come and go throughout the year, there is good reason on this occasion for Canadians to sit down and do some thinking about the Canadian Conference on Education's slogan for 1961: "Stay in School."

Our society has arrived at a point where it is having less and less need for untrained minds. The machine has replaced the pick and shovel. Automation has moved into our factories and offices.

Today employers have little interest in unqualified help, but are more and more interested in men and women who have trained minds—individuals capable of responsibility and initiative.

Today a grade 12 education which not too many years ago allowed an individual to feel educated, is now only an ordinary achievement.

Students who want to play a reasonable part in the affairs of their community and nation must be prepared to go on to specialized training at a University or an advanced technical school.

In almost every field we are becoming a society of specialists. There is less and less room for individuals to make a success out of their lives without specializing — without as a minimum a complete secondary education.

The Western World is being challenged as never before by the Communist states which are concentrating on educating an elite few, but are doing it on a massive scale at state expense. We in Canada today are moving to more and more state help in education, but the decision on which direction individual education will go is left to the student — he makes a free choice.

Unemployment is becoming a great national problem. Students thinking of giving up

school or university before graduation would do well to study recent Unemployment Insurance Commission statistics. Back in 1955, two out of every three unemployed had not gone beyond grade eight in school. It is also interesting to note that those with only two years of a secondary school education were not much better off than those who had only a grade eight education.

Surely, by now, or within a few years, those with only grade twelve will be almost in the same boat as those with grade eight education were five years ago. Our society is moving ahead swiftly. Those who are prepared for the technical era will reap the rewards.

We know the temptations that lead young people to want to leave school. Earning money and wanting to feel grown up may seem more attractive than getting a good education.

But their future depends on them sticking to their education.

It will pay off both for themselves, their nation and our way of life. Today our society needs young men and women capable of being highly trained to man our complex offices and factories, to staff our schools and colleges, and even represent us in our councils, legislatures and parliament.

We must encourage our young people to "Stay in School" so that they can share the rewards of a greater tomorrow. Education is the key to personal success and national prosperity.

Night worker's lot is unhappy one

COLD SPRING HARBOR, N.Y.—The night workers' lot is often not a happy one.

And it's worse for those on swing shifts who must work some days and some nights in the same week.

One reason for this difficulty, scientists are finding, is that such working hours can upset curious "clocks" that keep time in our bodies and regulate important rhythms of living.

These strange biological clocks are being discussed at a 10-day international conference of 100 scientists at the Long Island biological laboratory here.

In humans, the clocks time daily cycles in body temperature, output of adrenal hormones, disease-fighting white blood cells, blood sugar governing fatigue, alertness and other functions.

The human clocks do not all keep the same time. Body temperature, for example, usually reaches a peak in the afternoon, a low in the early morning hours. But adrenal glands generally pour out hormones just before your normal morning waking hours to help you meet the challenge of a new day.

Switching to night work can throw the clocks off schedule, but some people can reset their clocks more easily than others, or already have clocks that make them feel best at night.

Studies along this line were described in an interview by Dr. M. C. Lobban of the Medical Research Council Laboratories, London, a diminutive woman who loves the Arctic.

Splitzbergen, Norway, with continuous summer daylight, provided one perfect spot to test some Cambridge University volunteers doing research there. First she took away their watches. Then some got watches taking only 21 hours to tick off 24 hours. Others got watches taking 27 hours to show 24.

With no sunsets or sunrises to mark normal day and night the volunteers ate meals, worked and slept as though their watches were really counting off 24 hour days. Some men and women had more trouble in adapting, Dr. Lobban said, and different internal clocks in the same person did not reset themselves at the same rate.

Dr. Lobban says workers may become less efficient, and therefore less happy and perhaps less safe if their clocks get out of phase with their environment.

She stressed that more studies are needed. But one indication could be that if someone is assigned to night work, he should be kept on the same shift long enough to reset his clocks.

NO SURPRISE

A student from the state agricultural college told the farmer—"Your methods of cultivation are hopelessly out of date. Why, I'd be surprised if you get ten pounds of apples from that tree."

"So would I," replied the farmer, "that's a pear tree!"

Located in the Friendly, Pleasant Atmosphere of the Turtle Mountain Hotel Bldg. at FRANK, ALBERTA

NOTICE TO RESIDENTS OF ALBERTA

The Alberta Gas Trunk Line Company Limited has announced plans to raise the sum of \$10 million by the sale of 544,000, \$100 par value preferred shares of the Company. The sale price of the shares to the public has not been definitely fixed but will be announced when the securities are released for sale on or about March 7, 1961.

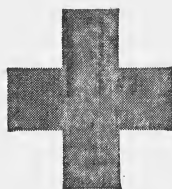

There will be no common share warrants attached to these securities and no right will be given to convert them to common shares at any time.

The issue will be underwritten by a group of Canadian investment houses (all of whom have offices in Alberta) under the joint management of Tanner Bros. Ltd. and Dominion Securities Corp. Ltd., and the underwriters have agreed to conform with Alberta Gas Trunk Line's policy that every opportunity shall be given to residents of Alberta to purchase these securities. Although the actual public offering will not be made until on or about March 7, 1961, this advance information is being released by the Company in Alberta to give Alberta residents ample opportunity to make inquiries concerning these securities.

Arrangements have been made whereby interested parties may make inquiries to and obtain information from Investment and Broker Dealers, Treasury Branches, or Chartered Banks in Alberta. Any person interested in purchasing the securities is requested to get in touch with one of these institutions as soon as possible and not later than Tuesday, March 7, 1961.

Muscular Dystrophy 1960 Campaign Real Success

Despite a period of mild economic recession in Canada, which has recently been admitted by Prime Minister Diefenbaker, one voluntary health association of Canada reports that its donations in 1960 had reached the highest peak in its history, with contributions totalling over \$337,000.

Arthur Minden, QC, president of The Muscular Dystrophy Association of Canada, attributed the increase to a growing concern among the public over the menace of muscular dystrophy to Canadian children.

"Both the public and the research scientists," said Mr. Minden, "seem to be determined that the mystery of the cause of this disease shall no longer remain unsolved."

Three hundred and thirty communities took part in this year's campaign, which ran for a week during November. Canadian fire departments have always been the chief money raisers for MDAC and in the 1960 campaign 250 fire departments carried out door-to-door canvasses and other fund raising measures.

Service clubs, Scouts and Guides also were active on behalf of the Association.

"We shall now be able to carry out a considerable expansion of our research program," said Mr. Minden, "and because most of it is in the field of basic bio-chemical research, we shall be adding invaluable data to the general pool of knowledge used by research scientists in added fields of medical investigation."

In addition to having research teams working in almost every Canadian medical research centre and university, MDAC is sponsoring two projects in Israel and one in the United Kingdom.

In the United States at the Institute for Muscle Disease Inc., MDAC is supporting the work of Dr. Michael Barany. The American MD organizations also have a world wide research program, and its co-ordination with Canadian efforts is effected by having a medical advisor Dr. A. T. Milhorst, who serves on both the Canadian and American medical advisory boards.

New Stamp To Be Issued In April

One of Canada's great political figures (during the time when this nation was emerging as a power on the international scene) is to be honored by the Canada Post Office with special commemorative stamp to be issued April 19, 1961, it was announced by the Hon. William Hamilton, postmaster general.

The blue-colored five-cent stamp will honor the late Rt. Hon. Arthur Meighen, who served as the Prime Minister of Canada from July, 1920, to December, 1921, and from June, 1926, to September of 1926.

One of the most vigorous and active men ever to enter public life in Canada Mr. Meighen was first elected to Parliament in 1908, representing the Manitoba constituency of Portage La Prairie.

Following a term as Solicitor-General in 1913, he became Minister of the Interior when the Union government was formed in 1917. He played a leading part in the acquisition of the Canadian Northern Grand Trunk Railway and the Grand Trunk Pacific Railway and was a leading spirit in the passing of the highly controversial Military Service Act in 1917.

Born on a farm near Anderson, Ontario, Mr. Meighen graduated from the University of Toronto in

1896 and practiced law in Manitoba. He retired from active political life in 1942 but retained an active interest in Canadian affairs, publishing several works on the political scene. He passed away at Toronto on August 6, 1950.

The design for this stamp in the Prime Minister Series was prepared by the Canadian Bank Note Co., Limited, and the engraving was based on the best likeness. Thirty-two million stamps will be printed.

Rural Realtors Organize

The First General Meeting of the Chinook Rural Realty Co-op. Bureau Ltd. was held in Port Macleod Wednesday, February 8th at which a representative group from 51 licensed real estate offices in Southern Alberta, completed the details for a Multiple Listing Bureau, to be located at Barons, Alberta. This is the first rural real estate co-op. in Alberta and possibly the first in Canada.

Officers elected at this meeting included: T. J. Meston of Meston Agencies, Okotoks, as chairman; Glen Gibb of Gibb's Realty, Barons, as secretary-treasurer; and five directors, Peter Buttendyk of Hi-Alta Agencies, High River; Willis A. Pitcher, Cardston Investments, Cardston; S. C. Hoare, Staveley; V. Jerome Platt, Taber; J. Lundy Findlay of Vulcan.

The rural realtors feel that through the united facilities of each of their offices, they will be able to offer better service to both the purchaser and the farmers and ranchers.

The rural realtors have always worked very closely with their neighboring colleagues, but are now able to do so on a broader scope.

Alberta Gas Trunk Line To Raise \$10,000,000

The Alberta Gas Trunk Line Co. Limited has announced plans to raise the sum of \$10 million by the sale of 544,000, \$100 par value preferred shares of the Company.

The sale price of the shares to the public has not been definitely fixed but will be announced when the securities are released for sale on or about March 7, 1961.

There will be no common share warrants attached to these securities and no right will be given to convert them to common shares at any time.

The issue will be underwritten by a group of Canadian investment houses (all of whom have offices in Alberta) under the joint management of Tanner Bros. Ltd. and Dominion Securities Corp. Ltd., and the underwriters have agreed to conform with Alberta Gas Trunk Line's policy that every opportunity shall be given to residents of Alberta to purchase these securities.

Step-Saving Efficiency Found in Modest Split-Level Design

From the street this modest split-level house has the appearance of an attractive one-story dwelling. Designed by architect K. R. D. Pratt, of St. Vital, Manitoba, the house combines the step-saving efficiency of a bungalow with the privacy of sleeping area found in the two-story house.

The U-shaped working area and the dining space provided in the kitchen should appeal to most housewives. An attractive feature of the plan is the upstairs hall, which forms a balcony overlooking the living room. Recreation rooms, as well as heating and utility facilities are on the level below the bedrooms. An abundance of window area ensures a bright and cheery atmosphere in the house.

The total floor area is 974 square feet and the exterior dimensions are 37 feet by 27 feet. Working drawings for this house, known as Design 753, are available from Central Mortgage and Housing Corporation at minimum cost.

Macleod Federal Liberal Association Annual Meeting on March 14th

For welcoming Lester Pearson, the Liberal leader, to Macleod riding, plans were made by Macleod Federal Liberal Association executive at a meeting held at Claresholm on Saturday afternoon, February 11th.

Mr. Pearson plans a trip west in May or June and Blairmore put forward a strong bid to have him speak there when he comes to the Macleod constituency.

The executive members who numbered 20, came from Vulcan, High River, Nanton, Carmanagay, Claresholm, Pincher Creek and the Crows Nest.

They also made plans to hold the annual meeting for the constituency on March 14, a day when many other Liberal groups will organize for 1961.

Earl Hastings of Calgary, Alberta, Association president, spoke briefly on the organization meeting held at Red Deer early in February and on plans for a province-wide publicity campaign.

A committee to nominate officers for 1961 met directly after the meeting to draw up a slate and another committee was given the job of organizing association meetings.

Dr. Gordon Burton of Claresholm, and Varno Westersund of Blackie, reported the events and discussions of the national Liberal rally held at Ottawa, Ont., in January and described the down-to-brass-lacks committee work done on the party's election platform for next election.

Dr. Burton commented on the number of outstandingly capable people who gave expert advice and dealt with very difficult subjects and on the goodwill which seemed to exist between the French- and English-speaking delegates.

Mr. Westersund reported on the work of the Defence committee, his comments being followed by a considerable discussion on the best way to empower delegates to vote in such a gathering.

Doctors changing ideas about fever treatment

Next time you run a high temperature, the best treatment may be to let it run its course.

Medical science is changing many long-held concepts about fever, the Reader's Digest reports. Among them: the idea that fever should be brought down by drugs, bed rest, "sweating it out" and "starving it out."

Author J. D. Ratcliffe notes that fever actually helps the body fight disease by prodding it to create germ-killing antibodies and white blood cells. At some temperatures, it can even cook bacteria to death.

It is important to remember that fever is not a disease but a symptom, says Ratcliffe. As such it can help doctors follow the course of an illness. That is why many physicians now question the wisdom of reducing common fevers with drugs such as aspirin.

Says Dr. Alan K. Done of Stanford University: "Anti-fever therapy is often employed more for the benefit of parents than the child. It is doubtful whether body temperatures in the range of 104 degrees are harmful, even if prolonged for a few days."

The old practice of "starving a fever" is also out. Today's rule: a diet high in vitamins and proteins, with all the liquid the patient can take.

Also scrapped is the concept of "sweating out" the fever by piling heavy blankets on the patient. A comfortable cool room is now prescribed.

Even bed rest is no longer the hard and fast rule it once was. One physician, Dr. John P. Gibson, studied the records of more than 1,000 feverish youngsters. He found that those who were allowed to be up and around the house improved just as quickly as those who were confined to bed. His conclusion: In ordinary illnesses, children may play quietly and rest as they desire.

"Normal" temperature is generally considered 98.6 deg. F. But don't worry if yours is a point higher or lower. Many doctors feel there should be a "zone" of normal temperature from 97.2 to 99.5, because morning low to a high point in late body heat varies daily from an early afternoon.

Seasonal Delights

SWEET SURPRISE

This is the time of year when the hand that reaches for the lemonade pitcher is sure to be reaching also for some tempting treat to go along with the tall frosty beverage. Whether the agenda for the day includes iced coffee for a summer kaffee klatch, or a fruit cooler for the afternoon break, try serving these Frosted Novelty Buns as an accompaniment. And don't be surprised if there are a number of requests for the recipe, because these buns are quite different from the usual sweet roll.

The buns are light and tender with an unexpected filling of chopped raisins and pecans, sweetened with brown sugar and flavored with orange rind and juice. After baking the buns are capped with Confectioners' Icing. For a little extra zip try adding a touch of rum flavoring to the icing.

FROSTED NOVELTY BUNS
(Yield — 1½ dozen buns)

½ cup milk, ¼ cup granulated sugar, ½ teaspoon salt, ¼ cup shortening, ½ cup lukewarm water, 1 teaspoon granulated sugar, 1 envelope active dry yeast, 3 cups (about) once-sifted all-purpose flour, ½ cup chopped pecans, ½ cup

chopped seedless raisins, ¼ cup lightly-packed brown sugar, ½ teaspoon grated orange rind, 1½ tablespoons orange juice.

Scald milk, stir in the ¼ cup granulated sugar, salt and shortening, keep at lukewarm temperature. Measure lukewarm water into a large bowl; stir in the 1 teaspoon sugar. Sprinkle with yeast. Let stand 10 minutes, then stir well. Stir in warm milk mixture and 1½ cups of the flour; beat until smooth and elastic. Work in sufficient additional flour to make a soft dough — about 1½ cups more. Turn out on floured board or canvas and knead until smooth and elastic. Place in greased bowl. Grease top. Cover. Let rise in a warm place, free from draft, until doubled in bulk — about 1½ hours. Punch down dough. Turn out on lightly-floured board or canvas and knead until smooth. Divide dough into 2 equal portions. Form each portion into a 9-inch roll and cut into nine 1-inch pieces. Cover with a tea towel and let rest while making filling.

Combine the chopped pecans, raisins, brown sugar, orange rind and juice. Divide into 18 small mounds. Flatten 1 piece of dough and place a pecan-raisin mound in center; wrap with dough and seal joints; drop into a greased muffin cup. Repeat with remaining pieces of dough and filling. Grease tops. Cover with a tea towel. Let rise in a warm place, free from draft, until almost doubled in bulk — about 45 minutes. Bake in a moderately hot oven (375 deg. F.) 15 to 18 minutes. Turn out onto cake racks; turn top-side up and frost with the following Confectioners' Icing; decorate each bun with a pecan half.

Confectioners' Icing: Combine 1½ cups sifted icing sugar, ¼ teaspoon vanilla, ¼ teaspoon rum flavoring (optional) and sufficient milk to make a rather stiff icing.

COULDN'T MISS

A film star who married rather often found it expedient to get a divorce in a hurry. Her lawyer suggested Mexico.

"But I don't speak Spanish," she protested.

"That's all right," said the lawyer. "Whenever there is a pause all you have to do is say 'Si, Si'."

When she appeared in court the crowds turned out to witness the event. There was much emotion and bowing, and the star said "Si, Si" very firmly on numerous occasions. Suddenly the crowd gave a great cheer.

"Well, I guess I'm divorced," said the star, complacently.

"Divorced, my eye!" cried her lawyer. "You've just married the judge!"

TOUCHE!

A man who was a witness in an accident case was being cross-examined by the prosecuting attorney. The attorney was quite surprised at the detail in which the witness described the accident.

In a derogatory manner he said, "You certainly seem to have phenomenal eyesight."

"Well, I don't know about that," the witness replied, "but in the morning I get up out of bed and look out my window and see the sun. I understand it is 93 million miles away. Yes, I think I have pretty good eyesight!"

Personalities IN THE NEWS

Miss Gail Murdoch, Reg. N., of Lacombe, accompanied by Mr. and Mrs. H. McNulley and Mr. Allan Jackson of Wetaskiwin, visited the former's parents, Mr. and Mrs. S. Murdoch.

Mr. and Mrs. Ron Jenkins of Cranbrook, B. C., were visitors with the latter's mother, Mrs. M. MacQuarrie. While here their young son was taken suddenly ill and was admitted to the Crows Nest Pass Municipal Hospital.

Born to Mr. and Mrs. Eddie Churla, Jr., a daughter at Crows Nest Pass Municipal Hospital on Feb. 23, to be named Darleen Marie.

Coleman patients in the Crows Nest Pass Municipal Hospital are Mrs. Earl Bagley, Mrs. Rose Coccione, Mrs. Mary Kosma and Mrs. Harold Pownall.

Mrs. Alice Van Wyk of Bellevue recently suffered a fractured arm as a result of a fall. Friends in the Crows Nest Pass wish her a speedy recovery.

The Misses Marian Ewashen, Christene Armstrong and Martha Ballak, all of Calgary, visited there parents recently.

Mr. Walter Nelson was admitted to the Calgary General Hospital last week. Friends wish him a speedy recovery.

Mr. Billy Anderson of Jasper, Alta., visited relatives and friends here last week.

Mr. and Mrs. J. Kinner, sr. Mr. R. Anderson and Mr. Archie Anderson attended the funeral of the late Mr. James Kellock in Calgary last week.

Mrs. Harold Pownall recently suffered a fall, fracturing her arm, she was hospitalized in the C. N. P. hospital. Friends wish her a speedy recovery.

Pass Rinks Cop Honors At Pincher 'Spjel

Four Pass rinks took top honors at a school bonspiel held in Pincher Creek, February 17, 18 and 19 — sponsored by the Matthew Halton and St. Michael's schools.

Some 32 southern Alberta rinks took part in the enjoyable 'spjel, which also featured a lovely banquet and a dance with the Lethbridge Checkers orchestra providing the music for the young people.

Winners of the first event, the Brent Gilbert rink of Blairmore; second, the Terry Field rink of Coleman; third, the Joe Vasok rink of Blairmore; and fourth went to the B. Johnson rink of Coleman.

Winners of the second event were the L. Fjordbottom rink of Granum; second, the Joe Chabillon rink of Blairmore; third, the DeMaere rink of Granum and fourth, the Vic Akit rink of Pincher.

Third event winners were Alan Gates rink of Coleman; A. White rink of Burnis, the Mary Lou McDowall rink of Pincher, and the Hugh Bonertz rink of Pincher.

Winners of the fourth event were — first, Ken Kishka rink of Blairmore; second, B. Williams of Blairmore; third, C. Cameron rink of Pincher, and fourth, the R. Pearson rink of Pincher Creek.

Other prizes were won by the B. Johnson rink of Coleman, for having made a six-ender, the biggest end of the spjel, while the Hugh Metzler squad of Pincher, were also awarded a consolation for having had the most points scored against them in one game, which saw the other team count up 19 points.

Traffic Officer Home & School Guest Speaker

Some 30 Coleman parents and teachers gathered in the School Auditorium last week to hear Maurice Jones of the Traffic Board, give an interesting talk on school buses in Alberta.

To highlight his address, Mr. Jones showed a film "Hit and Run Driver", which was well appreciated by the attendance. A vote of thanks was tendered to Mr. Jones by Mrs. Mildred Zak, who also introduced the speaker.

During the business portion of the meeting Mrs. Anna Jones reported on the progress being made by the committee to establish a library in Coleman.

The room attendance prize was won by Mrs. E. Malanchuk's grade seven class and she will be awarded a cheque to purchase an object of use for her class.

At the conclusion of the meeting a lunch was served by the committee.

Elks Name Winners at Bingo

The Coleman Elks Lodge held its regular bingo night last week and although the \$200.00 jackpot prize was not won the consolation prize of \$15.00 was awarded to Mrs. Ed Wakaluk of Blairmore.

Other prize winners at the affair were:

25 gallons gas, Louise McLeod. Tri-lite, Delores Kautz. \$24 cash, Freda Taje. Cannister set, Charles Sioman. \$12.50, Mrs. Lemenech. Grocery hamper, Violet Wavre-can.

\$25, Annie Topak. Electric toaster, Mrs. Bob Parry. Grocery hamper, Harry Gate. All the above are from Coleman. \$10 split between Mrs. R. Derbyshire and Mrs. Steve Rypien of Coleman.

\$10, Mrs. B. Barnett of Bellevue. End table, Mrs. Ida Scales of Fernie, B. C.

The next bingo night will be held in the Elks Hall on Friday evening, March 3rd.

Lions Bingo Winners Named

The Coleman Lions Club held another successful bingo night on Wednesday evening, February 22, and although the cash jackpot prize of \$175.00 was not won in the 59 number blackout the consolation prize was awarded to Mrs. Donna Jackson of Coleman and Mrs. F. Vyse of Blairmore. The consolation prize of \$12.00 was also awarded to Robert Jenkins of Coleman on the 55 number blackout for the \$80.00 cash prize.

Other winners at the affair were: \$10, Ida Collins of Coleman; \$12, Nora Gouding of Coleman; \$10, Emil Blas of Blairmore; \$12 split between Jean Fields and Harry Gate of Coleman; \$10, split among Freda Taje, Mrs. B. Crippen of Coleman, and Mrs. B. Barnett of Bellevue; \$10, Anne Topak; consolation prizes, June Collings, Sam Costanzo of Bellevue, and Mrs. Tiffin of Coleman; \$12 split between Mr. Bolesky and Nora Gouding of Coleman; \$10, Freda Taje of Coleman; \$10, Mrs. Donna Jackson.

Door prizes were awarded to George Forish, Mrs. Jasper Jones, Mrs. Agnes Rypien, all of Cole-

man, and Alan Carlson, of Blairmore.

Consolation prizes were awarded to Mrs. Williams, Andy Gettman, Rina Rinaldi, Alvina Pavlus of Coleman, and Mrs. Matt Jarvis of Blairmore.

The next bingo night will be held

on March 8th when a cash jackpot prize of \$190.00 cash will be offered for the first blackout in 60 numbers and also a prize of \$105.00 for the first blackout in 56 numbers. The regular other cash prizes will also be played for at the bingo night.
